VIRUS PROTECTION **10.10**

Automatic **SANITISING SYSTEM**

- Vaporize certified disinfectant for covid-19
- Manual, semi-automatic, automatic set up
- Sanitizes air, surfaces and air conditioning

BugsBy

The BugsBy automatic sanitising system is designed to vaporize the sanitising product using an electric suction pump and a heat exchanger operated by an electronic control unit that heats the liquid product to get steam.

It can be used for office and waiting areas, changing rooms, lavatories, dentist offices and other medical practices. It disinfects the surrounding air and surfaces in a fully automated fashion.

BugsBy is able to operate the sanitising cycles, in semi-automatic mode, according to the interiors dimensions and warns, with sound and light signals, when it is time to sanitize (the active ingredient is no longer effective). The sanitising alerts, continue, with scheduled intervals, until a new sanitising cycle is activated. In automatic mode, the system warns, with a 20 seconds sound alerts, that it is ready for sanitising, after 20 seconds the sanitising starts. When the cycle is completed the system resets and a blue light on the display informs that interiors are sanitized. The sanitising cycles take from minimum 5 seconds to a maximum of 80 seconds depending from the settings. The BugsBy System is working with normal domestic power.

BugsBy can be provided with different optional such as:

Remote manual starting by wi-fi

Photocells activation

Supply warning sensor (advise that the product inside is almost finished)

Full charge sensor (advise that the product is inside)

BugsBy is provided with a sd card recording all sanitising datas (day/hour)

ADVANTAGES:

- CONTINUOUS AND GUARANTEED SANITISING
- NO LABOR COSTS
- DOES NOT WET SURFACES
- STAINLESS STEEL STRUCTURE

The automated disinfection system Bugsby evaporates a disinfection liquid with the help of a pump, which sucks the liquid into the system, and a heat exchanger, which heats the liquid until it evaporates in the surrounding air. The system can be operated by an electronic control panel.

**BugsBy IS CE certified and
MADE IN ITALY**

BUGSBYSAN

BUGSBYSAN is special studied carrier that expand the sanitising capacity of the certified disinfectant allowing a better spread in the air and all surfaces.

AUTOMATIC SANITISING SYSTEM

The BugsBy sanitising system automatically vaporize the certified disinfectant product in all interior area.

BugsBy SANITIZES IN 2 MINUTES UP TO 500 SQUARE METERS

Offices, ambulances and vans, company canteens, locker rooms, trucks cabins, access gates, restaurants, ship cabins, toilets.

The system can be scheduled in different modes, according to various user needs, automatic, semi automatic and full manual

BugsBy OPTIONALS

- REMOTE CONTROL (FOOT OR BUTTON)
- SANITISING PRODUCT LOW LEVEL
- FULL CHARGE SENSOR
- SOFTWARE FOR SANITISING REPORTS
- MOBILE APP CONTROL

TWELVE GOOD REASONS TO CONSIDER SERIOUSLY OUR SANITIZING MACHINE BUGSBY 10.10

- 1) Very handy, easily transportable, despite being made of steel, like a diplomatic case.
- 2) The flat and square vertical structure allows it to be positioned anywhere without taking up space.
- 3) Very quiet and vibration-free, on any surface it is placed on. It does not overheat.
- 4) Small dimensions, lightness, power, allow the use of the machine in any sector, inside a passenger compartment, an ambulance, as in an area of 500 square meters, it can be fixed to the walls, in the trunk of a car, or placed on a piece of furniture, etc.
- 5) Thanks to the type of propulsion and the atomizer, it manages to have an output of at least 3/4 meters of dry steam, with minimum consumption and a total saturation of the environment in a very short time.
- 6) With the appropriate kit it can also be used for the sanitization of air ducts, for the spread of pesticides inside a greenhouse or nursery, for the elimination of mosquitoes.
- 7) The liquid used is a compound of a mixture between a Virucide / Biocide medical device, and a liquid of our production a natural carrier, which allows a greater diffusion of the dry vapor in the environment, keeping it in suspension for a longer time the medical device, thus allowing a complete and total sanitation.
- 8) the machine carries a charge of 500mli instead of a liter and is so lighter and more manageable, easily transportable by anyone.
- 8) The 500ml liquid refills are delivered by us ready to be inserted in the appropriate tank.
- 9) The liquid can be scented with pleasant essences especially for clinics, retirement homes, kindergartens and cars.
- 10) But the most important thing is the assistance and the ability of our team to satisfy customer requests, being able to modify the machine for use and consumption of their needs, both from a mechanical point of view (installations, structural changes, various applications) but also electronically, such as programs required to be included in the existing App, remote controls, registrations, etc. We are able to travel throughout Italy to study the project for the installation or programming of the machine.
- 11). The very competitive price, given the characteristics of the product and its liquid, thus giving everyone the opportunity to access the purchase of a valuable machine.
- 12) The price very competitive both for the product and for the liquid, allow to buy BugsBy 10.10 and its sanitizer, for people who want to protect themselves from virus or bacterial infections.
